

Floral Arrangement on a plate

Before beginning this activity, ask your parents or caregiver for a plate that you can use.

Materials

- Plate or a saucer (glass, plastic or paper plate)
- Range of natural resources from your garden (leaves, flowers, petals, sticks)
- Vaseline (optional only if you have it)

Instructions:

- Make a plan of how your floral pattern will look (set it out on an area the same size of your plate)
- Check that it looks right and that you're happy with your design and patterns.
- Select your plate and rub a thin layer of Vaseline on the plate
- Arrange the natural resources you have gathered on the plate
- Take a photo of your creation or you may choose to make a little video of you creating your design / patterns.

There are several examples on the internet if you need inspiration.

Have Fun!!
